

x MARFU staff must be consulted when selecting electrical equipment for purchase and when installing any electrical

comply with these guidelines will result in suspension of User Approval and a charge of \$150 per hour cleaning could apply.

Seawater Supply and After Hours Support

- x MARFU is an inland research aquarium, all seawater is delivered by truck therefore all water levels throughout the facility are continually monitored and unfortunately there can be times of minimal availability of seawater.
- x During times of low seawater availability, facility staff may have to restrict water use and not allow the start up of new research projects to ensure the continuity of existing research.
- x Please always consider your seawater a precious resource and report
