Graduate Opportunities

Marine Science encompasses elements of marine biology, oceanography, marine geosciences and environmental management. Study not only the ocean, but the multitude of ecosystems that exist below the surface, including coastal environments, ocean currents and the sea floor. Bachelor of Marine Science graduates possess skills needed to address the challenges facing the and coasts over coming decades.

With a future focus on the Blue E

It is essential that you **keep a diary/ePortfolio** of your experiences; record any key tasks and skills used to deliver those tasks, main challenges and how you tackled them, what you would do differently next time, any measurable results, how you liked the experience, your energy and engagement levels. These notes will help you choose the right career path and allow you to provide evidence about your competencies in your job applications.

Keep **reviewing job descriptions** in areas of your interest and note the technical skills that you will need to develop to be considered for those positions. Some of them, if not covered in your course, could be acquired through a [MOOC](#) micro credential and/or [LinkedIn Learning](#) and applied in volunteering.
