- 0 Solander Road prototype pipe culvert fishway is located on University Creek on James Cook University campus in Townsville
- 0 University Creek has 13 native freshwater fish species – the culvert has been a barrier to migration to upstream habitat areas
- 0 the fishway was developed in 2005 – at least 9 native species have moved upstream through the crossing since 2006
- 0 collaborative funding support for the project was provided through the University and industry and community partners

CLIENT AND PARTNERS

Department of Main Roads

PROJECT OBJECTIVES

- x provide for upstream fish passage at crossing
- x develop and test prototype fishway for pipe culverts
- x develop remediation measures for culvert and creek
